

Asset Recovery

Brandenburg®

ASSET RECOVERY

REPURPOSING | RECYCLING | REMOVAL | RIGGING | REMEDIATION | RETIREMENT | RECOVERY | RETROFIT

Brandenburg has performed several industrial projects involving the selective removal of retired assets for the purpose of recycling, retooling, upgrading, or converting systems. Brandenburg's asset recovery initiatives are designed to return the maximum value to the owner that the equipment resale and scrap markets will bear. To successfully market assets, Brandenburg develops a project-specific asset marketing plan. In addition, concrete, brick, block, ferrous metal, non-ferrous metals, carpeting, glass, drywall, etc. will be reused onsite or sent to an off-site recycling facility for reintroduction/afterlife into the commercial market.

The company's engineering and estimating staff provides diverse backgrounds and industry-specific knowledge to design and implement exacting operational plans which are responsive to customer needs. The company performs extensive project assessment and planning to develop contract terms and specifications which address the unique requirements of each project.

The company has maintained consistent and strong annual growth by focusing on customer service to develop and deliver engineered solutions for demolition, environmental remediation, and asset retirement. Comprehensive technical expertise in utilities, safety, and environmental operations enables Brandenburg to meet demanding project schedules.

Brandenburg is one of the nation's premier demolition contractors. We specialize in demolition, asset retirement, asbestos abatement, hazardous materials removal, soil remediation, and excavation. With seven regional offices, our workforce provides the knowledge and expertise necessary to get your job done safely and efficiently.
