Brandenburg®

MINING

BRANDENBURG SERVES MAJOR INDUSTRIES INCLUDING MINING, REFINING, PHARMACEUTICAL, POWER GENERATION, STEEL PRODUCTION, CHEMICAL MANUFACTURING, PETROLEUM, AND AUTOMOTIVE.

Brandenburg is the premier provider of turnkey demolition, decommissioning, and environmental remediation services for the mining industry.

We specialize in the demolition of large heavy-steel structures and have been the preferred provider of these services throughout the United States. These include the 7000-acre BHP Copper Mine in San Manuel, Arizona, five ASARCO Arizona mines, the 600-acre U.S. Steel Southworks plant in Chicago, and Bethlehem Steel's 1800-acre main plant in Bethlehem, Pennsylvania, one of the nation's largest Brownfield sites.

Our state-of-the-art equipment includes six Liebherr 984 excavators. These machines weigh in excess of 300,000 pounds and, with grapple and shear attachments, are ideal for demolition work related to typical heavy concrete and steel structures associated with the mining industry.

Brandenburg's dedication to safety is unparalleled. We are the first demolition contractor to successfully complete OSHA's Challenge Program and the first to become members of the International Society of Mine Safety Professionals. All Brandenburg employees receive a multitude of applicable training from first aid and CPR to fall protection, asbestos and hazwopper training. Every employee is put through our detailed new employee training and has 10-hour OSHA training prior to beginning any field work.

Brandenburg is committed to providing a safe work environment for our employees and our customers.
