Brandenburg®

POWER GENERATION

BRANDENBURG INDUSTRIAL SERVICE COMPANY HAS PROVEN TO BE THE PREMIER DEMOLITION AND ENVIRONMENTAL REMEDIATION CONTRACTOR FOR POWER PLANT DECOMMISSIONING AND RETROFITTING.

Brandenburg services utility companies throughout the United States by performing demolition and repurposing projects ranging from the selective removal of obsolete equipment (scrubbers, precipitators, etc.) to the complete remediation and closure of power plant facilities.

Brandenburg's ability to perform asbestos abatement, demolition, intake and discharge closure, and final site restoration work provides a competitive advantage for safely and successfully completing projects for the demanding power industry. Brandenburg's extensive knowledge and experience servicing the power industry has provided the company with the ability to maximize the value of all plant assets. This knowledge allows Brandenburg to give the customer the maximum return on both scrap and salvage assets. It also makes it possible to perform delicate selective demolition in active plants without disrupting current operations. The company's industry leading safety program, skilled workforce, and specialized equipment allow for the timely removal of retired facilities that have been replaced by environmentally sensitive and energy-efficient plants.

The company's engineering and estimating staff provides diverse backgrounds and industry-specific knowledge to design and implement demanding operational plans which are responsive to customer needs. The company performs extensive project assessment and planning to develop contract terms and specifications which address the unique requirements of each project. Based on knowledge and experience of power plants, Brandenburg is able to provide accurate order of magnitude estimates for the demolition and/or selective equipment removal at these facilities. Brandenburg offers to visit facilities and provide budget cost estimates to aid the customer in determining the future disposition of their power generating facilities.

POWER SERVICES PROVIDED

- Demolition
- Environmental remediation
- Total plant decommissioning
- Retrofitting
- Asbestos abatement
- PCB removal
- Hazardous waste management
- Asset recovery
- Structural removal
- Site preparation

POWER CUSTOMERS

- Allegheny Energy
- Alliant Energy
- Alstom
