

Brandenburg Industrial Service Co claimed the "best of the best" World Demolition Award for the USA as the World Demolition Summit (WDS) returned in-person to Europe for the first time since 2018.

The contractor's transatlantic triumph at the awards evening in Vienna, Austria, was in recognition of its removal of coal-fired plant on behalf of the Tennessee Valley Authority, which had already won the Contract of the Year US\$1 million or over category.

Its overall success was even more notable as the 10 contractor-based shortlists had produced a different winner each time, making competition for the top award extremely fierce.
