

Brandenburg participated in the 2025 OSHA National Safety Stand-Down to Prevent Falls and is proud to have participated every year since its inception in 2012.

Throughout the week, our safety personnel and supervisory teams led presentations focused on a variety of critical fall protection topics.

These included; Personal Fall Arrest Systems, Walking and Working Surfaces, Safe Mounting and Dismounting Techniques, emphasizing the Three Points of Contact, Ladder Safety, Emergency Rescue Procedures in the Event of a Fall and Engineering Fall Hazards out of the the worksite.

We were also fortunate to partner with Guardian Fall Protection, who conducted live, in-person demonstrations to illustrate the impact and effectiveness of various fall arrest systems.

As a proud participant in OSHA’s Voluntary Protection Program (VPP), Brandenburg remains deeply committed to maintaining the safest worksites in the world. This commitment is made possible through the dedication of our leadership, and—most importantly—the ongoing engagement and buy-in from every crew member on-site.

Thank you to everyone at Brandenburg who helped make this week a success.  
Stay safe, and keep looking out for one another!
